Method Market Ma

Straw

The technology

bendable – clean basic fodder less wear – more performance

Uniform swath

in all conditions thanks to a small pick-up and a roller, even at high working speeds.

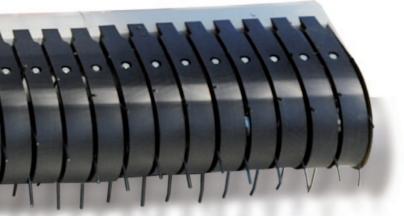

Anti-loss System

unique tine mounting, a screw attaches six tines. Tines can not be lost anymore.

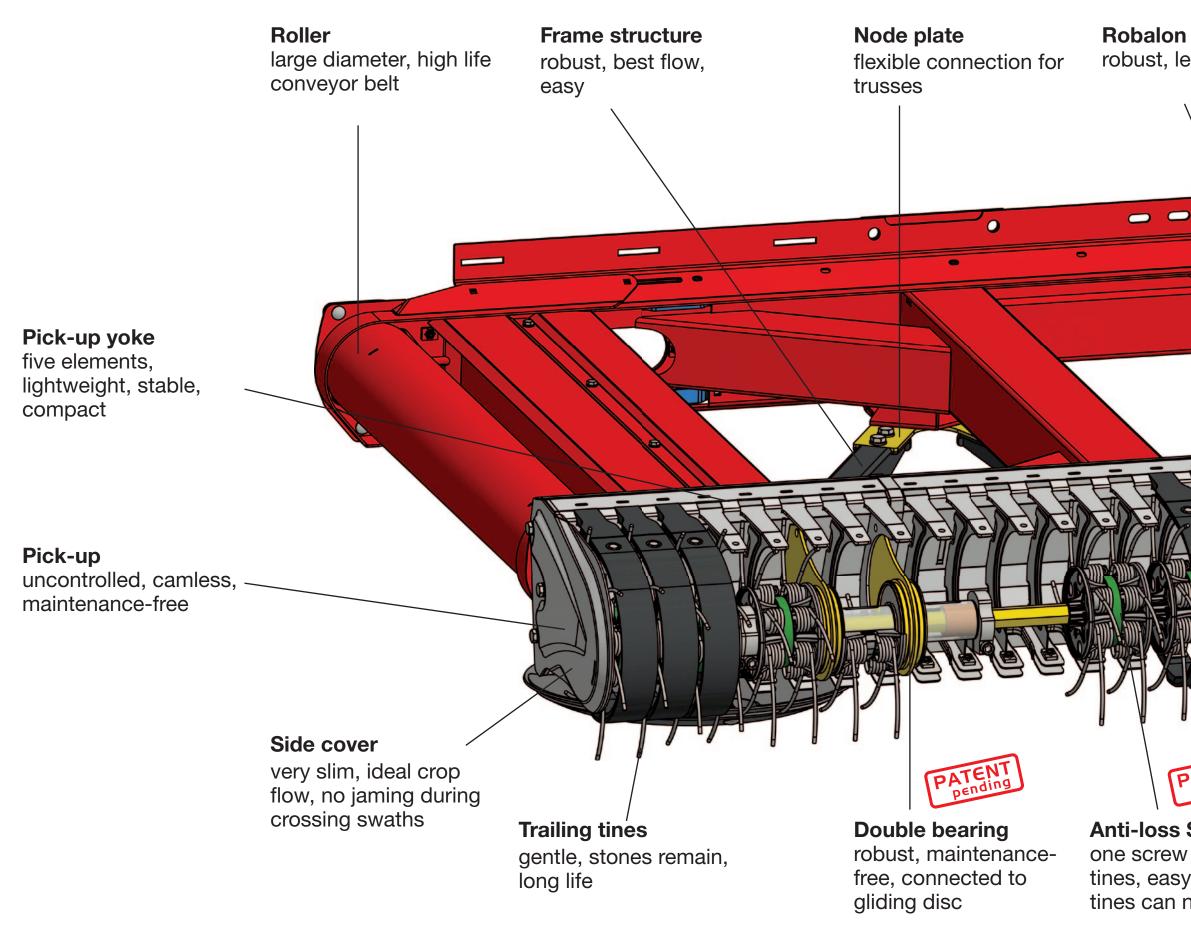

Double bearing

labyrinth seal 1: slit between tine-holder and bearing shell. labyrinth seal 2: metallic centrifugal disc prevents the entry of dirt and blades of grass to the bearings, simple, robust, maintenance-free.

RESPIRO – The pick-up: flexible, camless, slim, robust,

Robalon bend robust, less tine wear

Cleaning strip 1 diagonally across the lower belt part

0

0

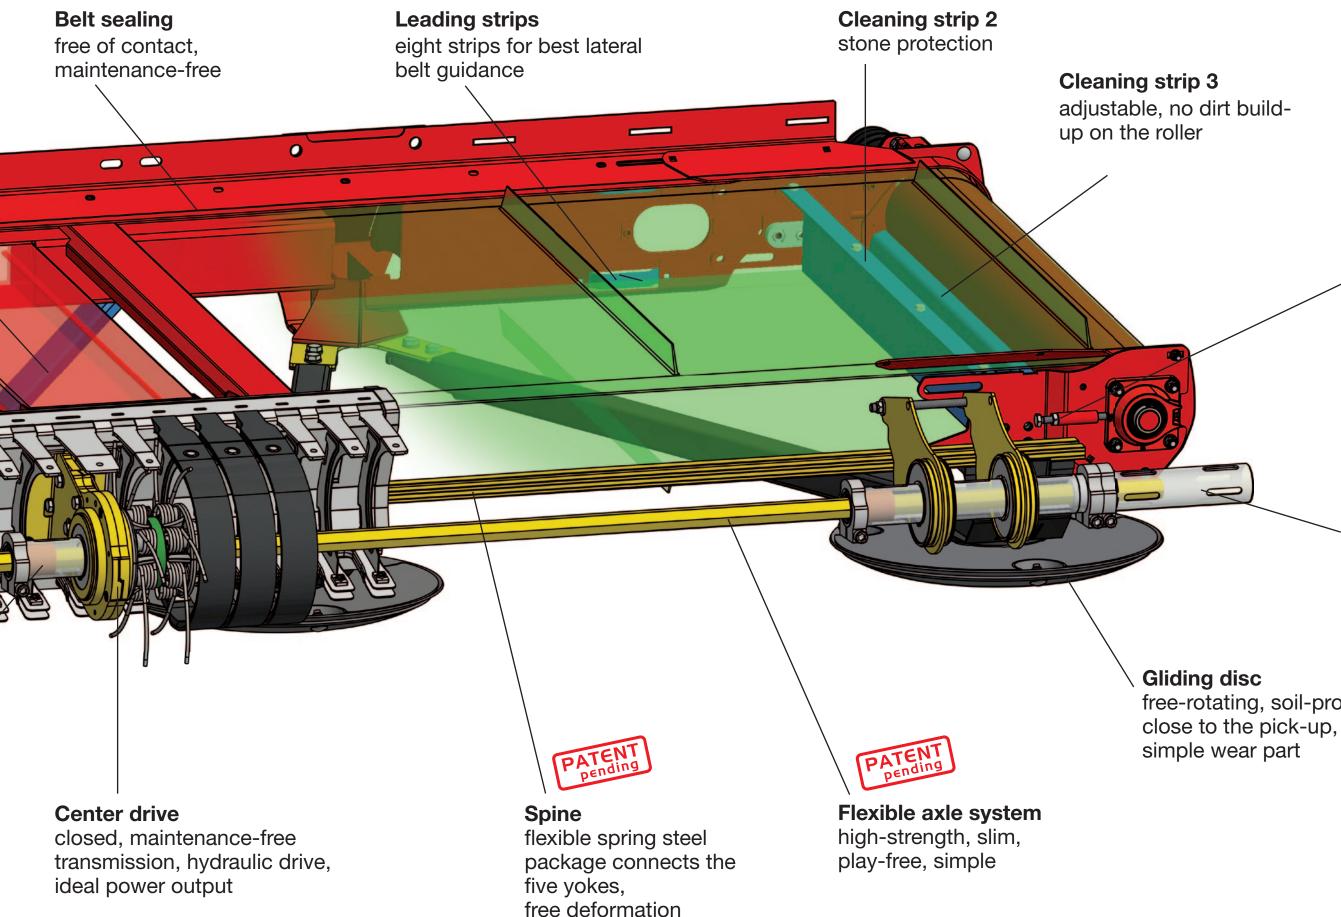

Anti-loss System one screw attaches six tines, easy change, tines can not be lost

Rubber-metal element protection for highstrength elastic shaft when bending the pick-up

maintenance-free, low-wear, unique

Fine adjustment

flange bearing adjustable, perfect belt run

Tear-off element

play-free, collision protection

free-rotating, soil-protecting,
